MIXED-USE DEVELOPMENT

Wyndham's mixed-use model may include combinations of vacation ownership apartments, hotel rooms, privately-owned apartments and retail in the same development. It presents great synergies and benefits to hoteliers.

Benefits

- In most cases, Wyndham Destinations Asia Pacific holds equity in the property and therefore contributes towards the running of the hotel or resort. This increases profitability elsewhere in the development, which Wyndham runs as a conventional hotel or resort.
- Vacation owners from Club Wyndham South Pacific or members from Club Wyndham Asia pay maintenance levies, which helps keep the property running.
- As an obligation to club members, common spaces and club apartments are refurbished approximately every five years. This regular upkeep has positive flow-on effects for hotel guests.
- Club inventory achieves close to 90 per cent occupancy year round, providing a boost to on-property food and beverage and retail outlets, while creating multiple streams of revenue.
